CONCORDIA UNIVERSITY

ACADEMIC EXCHANGES WITH THE PEOPLE'S REPUBLIC OF CHINA

OFFICE OF THE VICE-RECTOR, ACADEMIC

DECEMBER 1986

Concordia University is actively engaged in academic exchanges with the People's Republic of China. During the past six years fifty-one of our professors have visited China for academic purposes and eighty-one Chinese academics have been accommodated in fifteen of our departments as graduate students or visiting scholars. During this period the University has formalized three agreements of cooperation with China and is currently engaged in the negotiation of special exchange relationships with several other major Chinese institutions.

In light of these contacts with China and in response to recent initiatives from both the Chinese and Canadian governments, Concordia University is sending a four-member academic delegation to China in February 1987. The members of the delegation are Vice-Rector Academic F.R. Whyte, Dean of Engineering and Computer Science M.N.S. Swamy, Dean of Arts and Science, C.L. Bertrand and former Provost M. Singer. The primary mission of the delegation will be to visit the Nanjing Institute of Technology - one of China's key polytechnical universities - in order both to negotiate an academic exchange agreement between our two institutions and to initiate the process of applying for substantial external funding. Given the extent of Concordia's involvement in academic exchanges with China, the delegation is also visiting ten other Chinese institutions: either to strengthen existing linkages, to conclude agreements currently under discussion, or to explore new initiatives identified by individual professors. The delegation also expects to meet with high-level Chinese education officials to discuss the future role of Concordia University in Canadian academic exchanges with China.

CONCORDIA UNIVERSITY PROFESSORS WHO HAVE VISITED CHINA

Concordia University professors have demonstrated considerable academic interest in China. A total of fifty-one of our professors and librarians have made seventy-six trips to China since 1970. The largest number of professors have come from the Faculty of Arts and Science (20), with significant numbers from the Faculty of Engineering and Computer Science (15) and the Faculty of Commerce and Administration (11). These professors have been drawn from twenty-six academic departments, with the greatest number coming from our Departments of Mechanical Engineering, History and Management and our Centre for Building Studies. There has been a dramatic increase in the volume and academic content of faculty trips to China during the past five years.

FACULTY OF ARTS AND SCIENCE

S. R. Aiken, Associate Professor of Geography, visited Guangzhou and Guilin for one week in early 1982 as a tourist.

J. Barakett, Associate Professor of Education, visited China in 1976 as participant in a Concordia course on "East Asia: Past and Present." During a two week period she toured Beijing, Nanjing and Shanghai and visited Nanjing and Tongji Universities.

K. Bindon, Associate Professor of History and Executive Assistant to the Rector, visited the Guangzhou area briefly during the summer of 1985. She returned to China in August 1986, visiting Shanghai and Beijing and meeting with representatives of People's University to explore the feasibility of a training and technology transfer project.

L. Crysler, Associate Professor and Director of Journalism, visited China for three weeks in June 1983 under the auspices of the Canada/China Friendship Society. He toured Beijing, Luoyang, Xi'an, Nanjing, Suzhou, Shanghai and Guangzhou. He also led seminars on journalism at People's University, Fudan University and Jinan University. He returned in June 1985 as a tourist, visiting four cities and again making contact at People's University.

G. Decarie, Associate Professor and Acting Chairman of History, has made three two week trips to China as a tourist. In August 1983 and again in July 1984 he visited the Guangzhou area and Zhongshan University. In July 1985 he toured Beijing, Shanghai, Guilin and Guangzhou.

E. F. Enos, Associate Professor of Exercise Science and Director of Athletics, first visited China in 1979 in order to explore with the National Research Institute of Sports Science the

feasibility of bringing study tours to China. He returned with groups in 1980, 1981 and 1982 to examine Chinese physical education and sports science facilities under the auspices of the University's Institute of Comparative Physical Education. Most recently he visited Beijing for ten days in January 1985 at the invitation of the National Research Institute of Sports Science and lectured on technological advances in sports equipment.

G. Geddes, Associate Professor of English, first visited China for ten days in 1981 as leader of a delegation of Canadian writers. Hosted by the Chinese Writers Association, the delegation visited Beijing, Xi'an and Guangzhou and met many Chinese writers. His trip resulted in the publication of two books: China: Memoirs of the Gang of Seven and The Terracotta Army. He returned to China in June 1985 (again at the invitation of the Chinese Writers Association) and gave lectures and readings in Beijing, Shanghai, Xi'an and Guangzhou; he also had the opportunity to tour Huhehot, Suzhou, Hangzhou and Guilin.

J. L. Hill, Associate Professor of History, visited the Guangzhou area for one week in July 1985 as a tourist.

A. Jay, Adjunct Assistant Professor of Religion, visited China for three months during the summer of 1985. Hosted by People's University (where her husband was giving a CIDA-sponsored management course), she had the opportunity to do research on women in China. She also toured Beijing, Xi'an, Chengde, Datong, Qufu, Luoyang and Lhasa.

Z.R. Liu, Associate Professor of Economics, spent both the 1978/79 and 1986/87 academic years in China. Hosted by the Beijing Institute for Economic Research, his research focused on Chinese trade and development patterns.

M. Marsden, Associate Professor of Geography, visited China for three weeks in September 1986 as a tourist. During his tour of Beijing and other Chinese cities, he focused on environmental issues.

S. K. Misra, Professor of Physics, visited China for six weeks in November 1985 at the invitation of the International Advisory Panel and Review Commission of the State Education Commission. He spent one month at Nanjing University's Center for Material Analysis, where he lectured on "Electron Paramagnetic Resonance" and on "Electron Nuclear Double Resonance." In addition, he had the opportunity to appraise Chinese research, teaching and equipment in the field of spectroscopy and to negotiate a draft exchange agreement between Nanjing University and Concordia University. He also toured Beijing, Xi'an, Chongqing, Guilin and Guangzhou.

E. B. Newman, Professor of Biology, spent four months in China in spring 1985 at the invitation of the Chinese University of Science and Technology. She taught a graduate course on

"Bacterial Metabolism and its Regulation" at the University's graduate campus in Beijing. She also lectured on "Photosynthetic Bacteria" at Beijing University and on "Regulation of Bacterial Metabolism" at the Microbiology Institute of the Chinese Academy of Sciences in Beijing and at the Microbiology Institute of Shandong University in Jinan. In addition to Beijing and Jinan, she also toured Guangzhou, Kunming, Chengdu and Xi'an.

N. Segalowitz, Associate Professor of Psychology, visited China twice - for six months in 1984 and four months in 1985 - in conjunction with his wife's employment at the CIDA-sponsored Canada-China Language Training Centre. During both visits he offered a psychology course on language learning to professors and graduate students of the University of International Business and Economics (on whose campus the Language Training Centre is located). He also visited the Psychology Institute of the Chinese Academy of Sciences and Beijing Normal University and presented a paper on language teaching to a 1984 conference at the Beijing Second Foreign Languages Institute. In addition, he had the opportunity to travel to Chongqing, Chengdu, Xi'an, Wuhan, Qufu and Beidaihe.

M. Singer, Associate Professor of History and formerly Provost of the Faculty of Arts and Science, has visited China on three occasions. In May 1975 he brought thirty-seven Concordia students to Guangzhou as part of a thirty day five country field trip for his multi-disciplinary course East Asia: Past and Present. He returned to China in May 1976 with forty-two Concordia students, visiting Beijing, Nanjing and Shanghai as part of a thirty day study tour of China and Japan. He traveled to China again in May 1986 after the publication of his study Canadian Academic Relations with the People's Republic of China Since 1970 by the International Development Research Centre. Hosted by the Chinese Education Association for International Exchanges, he visited nine universities and academies, conducted six regional seminars with Canadian-trained professors who had already returned to China and met with education authorities in Beijing, Nanjing, Xi'an, Hangzhou and Shanghai.

B. M. Smith, Associate Professor of Applied Linguistics, visited China for three months in 1977 as part of the first official group of English language teachers dispatched to China by the Association of Universities and Colleges of Canada. He - and then Concordia instructors Anne Stokes and Wendy Allen - spent the summer of 1977 teaching English teachers at the Guangzhou Foreign Languages Institute.

J. Stewart, Professor of Psychology, visited China in summer 1974 under the auspices of the McGill Graduate Society. Her three week tour included Beijing, Tianjin, Wuhan, Shanghai and Guangzhou and visits to the Physiology Institute in Shanghai and to the Biology Department of Beijing University.

J. Upshur, Professor of Applied Linguistics, visited China as a

tourist in 1980 and again in 1981. He toured Beijing, Shanghai and Xi'an and visited both the Beijing Foreign Languages Institute and the Xi'an Foreign Languages Institute.

G. Valaskakis, Associate Professor of Communication Studies, visited China in September 1982 under the auspices of the Canada/China Friendship Society. During her nearly four week stay she toured Beijing, Shanghai, Guilin, Xi'an, Hangzhou and Guangzhou and visited the New China News Agency and several Chinese universities.

R. S. Wareham, Associate Professor of English, spent five months in China from September 1985 through February 1986 as a "foreign expert" employed by Hangzhou Teachers College. He taught three English literature courses to students preparing to become English language teachers in middle school and to junior and senior instructors in the College and also presented a lecture series on modern British and American authors. In addition, he toured Beijing, Shanghai, Suzhou, Guangzhou and Hainan Island.

FACULTY OF COMMERCE AND ADMINISTRATION

S. H. Appelbaum, Professor of Management and Dean of the Faculty of Commerce and Administration, traveled to China in April 1986 under CIDA auspices. During a one week visit he and other Montreal-area university management deans met with Chinese education officials in order to negotiate Phase II of the Canada/China Management Exchange Program.

V. V. Baba, Associate Professor and Chairman of Management, visited China in spring 1985 under the auspices of Concordia's CIDA-funded management exchange program with China. He spent three months at People's University in Beijing presenting a graduate course on "Principles of Management." He also lectured on "Research Trends in Employee Organizational Linkages: An Outcome-Based Approach" to a joint meeting of the Chinese Academy of Social Sciences and the Beijing Behavioral Sciences Association; and on "Management Development: A Behavioral Approach" at an International Symposium on Economy and Management held outside Beijing. In addition, he had the opportunity to travel to Qufu, Xi'an, Inner Mongolia, Lhasa, Datong, Chengde and Luoyang.

D. D. Doreen, Associate Professor of Decision Sciences and Management Information Systems, visited China in spring 1986 under the auspices of Concordia's CIDA-funded management exchange program with China. He spent two months at People's University in Beijing presenting a graduate course on quantitative methods.

D. Gandhi, Professor and Chairman of Finance, visited China in summer 1986 under the auspices of Concordia's CIDA-funded management exchange program with China. He spent two months at

People's University in Beijing presenting a graduate course on microeconomics.

H. A. Gram, Associate Professor of Management, visited China in spring 1986 under the auspices of Concordia's CIDA-funded management exchange program with China. He spent one month at People's University in Beijing presenting a lecture series on corporate strategy.

V. H. Kirpalani, Professor of Marketing and International Business, traveled to China in January 1983 and again in June 1983 in his role as Director for Concordia University of the Montreal universities management exchange program with Tianjin University and People's University.

M. Laroche, Professor of Marketing, visited China in July 1985 as a tourist. During his nine day stay he traveled to Beijing, Shanghai, Guilin and Guangzhou.

H. Mann, Professor of Accountancy, visited China in spring 1986 under the auspices of Concordia's CIDA-funded management exchange program with China. He spent seven weeks at People's University in Beijing presenting a graduate course in accountancy. He also traveled to Tianjin, Chengdu, Lhasa, Guilin and Guangzhou.

W. Porterfield, Executive-in-Residence in the Management Department, visited China in summer 1986 under the auspices of Concordia's CIDA-funded management exchange program with China. He spent two months at Tianjin University presenting a graduate course on international business. He also traveled to Tianjin, Beidaihe, Xi'an, Chongqing, Wuhan and Shanghai.

C. L. Sandblom, then Professor of Quantitative Methods, visited China in spring 1984 under the auspices of Concordia's CIDA-funded management exchange program with China. He spent two months at People's University in Beijing presenting a graduate course on quantitative methods.

F. Sbrecchi, Associate Professor of Accountancy, visited China in spring 1984 under the auspices of Concordia's CIDA-funded management exchange program with China. He spent two months at Tianjin University presenting a graduate course on accountancy.

FACULTY OF ENGINEERING AND COMPUTER SCIENCE

C. Bedard, Assistant Professor of Building Studies, visited China in August 1986 with a Concordia delegation that was invited by the Chinese Academy of Building Research. In addition to visiting the Academy in Beijing, he visited the Research Institute of Structural Engineering, Beijing University, Qinghua University, the Nanjing Institute of Technology and the Shanghai College of Architecture and Municipal Engineering and had

discussions with officials from the Northwest Institute of Architectural Engineering in Xi'an. He lectured on the academic programs and the teaching and research activities of our Centre for Building Studies.

T. D. Bui, Professor of Computer Science, visited China briefly in August 1985 and lectured on "Computational Methods for Microcomputers" at the South China Institute of Technology.

R. M. H. Cheng, Professor of Mechanical Engineering, traveled to Beijing briefly in January 1984. He visited Qinghua University in order to explore the feasibility of collaborative research in the area of "industrial applications of microprocessors."

P. Fazio, Professor of Building Engineering and Director of our Centre for Building Studies, visited China in August 1986 as the leader of a Concordia delegation that was invited by the Chinese Academy of Building Research. In addition to the Academy in Beijing, he visited the Northwest Institute of Architectural Engineering in Xi'an, the Nanjing Institute of Technology, the Departments of Mechanics of Beijing University and Qinghua University and the Shanghai College of Architectural and Municipal Engineering. He lectured on the teaching and research activities of the Centre for Building Studies and on the needs and priorities of building research in Canada. He also negotiated an exchange agreement "in principle" between the Centre for Building Studies and the Chinese Academy for Building Research.

S. A. Gracovetsky, Associate Professor of Electrical Engineering, traveled to Beijing in November 1978 at the invitation of the Chinese Ministry of Health. During his three week stay he visited Beijing University and a number of Beijing hospitals and lectured on "Spine Mechanics Surgery."

A. M. Hanna, Associate Professor of Civil Engineering, traveled to Beijing in August 1986 at the invitation of the Chinese Geotechnical Society and the Chinese Academy of Building Research. During his one week visit he attended an international conference on deep foundations, where he presented two research seminars on pile foundations and spoke on biofoundations. He also had the opportunity to visit the facilities of the host Chinese organizations and spoke at the Chinese Academy of Building Research.

C. C. C. Kwok, Professor of Mechanical Engineering, has visited China on three occasions in order to facilitate the conclusion of an academic exchange agreement between our university and Shanghai Jiaotong University. In November 1984 he accompanied Professor T. S. Sankar during his visit to the Shanghai Jiaotong campus; in winter 1985 he visited both Shanghai and Beijing; and in winter 1986 he returned to the Shanghai Jiaotong University campus in order to give a presentation on Concordia's Department of Mechanical Engineering to appropriate Chinese

professors.

C. Lam, Associate Professor of Computer Science, traveled to China in June 1986 at the invitation of the Shenyang Computing Institute. During his three week visit he lectured in Shenyang on "Exhaustive Search Techniques," "Search for Projective Plane of Order Ten" and "Pascal C." He also participated in an international conference on "Graph Theory and Its Applications" in Jinan and toured Beijing.

S. Lin, Professor of Mechanical Engineering, first visited China in 1977. In 1980 he returned to China at the invitation of the Shanghai Institute of Mechanical Engineering; he lectured for one month at the Institute's Solar Energy Research Centre, and visited both Shanghai Jiaotong University and the Beijing Solar Energy Research Institute. In 1983 he lectured at the Shanghai Institute of Mechanical Engineering, at Shanghai Jiaotong University and at Guangxi University. In fall 1984 he returned for a two month visit. He lectured at Guangxi University, at the Chinese University of Science and Technology and at Shanghai Jiaotong University. He also visited the Shanghai Institute of Mechanical Engineering, the Shanghai Institute of Technology, the Beijing Institute of Technology, the Beijing Institute of Aeronautics and Astronautics and Guangdong Polytechnical Institute.

H. J. McQueen, Professor of Mechanical Engineering, traveled to China in June 1981 at the invitation of the Chinese Academy of Sciences. During his one month visit, he delivered a series of lectures on "High Temperature Deformation and Fracture of Metals" at the Metal Research Institute of the Chinese Academy of Sciences. He also lectured on "Hot Working and Controlled Rolling of Steels" at the Iron and Steel Research Institute of the Ministry of Metallurgical Industry in Beijing; on "Hot Working of Steels" at the Anshan Steel Works; and on "Hot Working of Metals" and "Dislocations in Metals" at the South China Institute of Technology in Guangzhou. In addition, he had the opportunity to tour Shanghai and Hangzhou.

T. S. Sankar, Professor and Chairman of Mechanical Engineering, traveled to China in November 1984 at the invitation of the State Education Commission and Shanghai Jiaotong University. He lectured on eight aspects of "Mechanical Systems Research" at institutions in Beijing (Beijing Institute of Technology and the Chinese Mechanical Engineering Society); in Xi'an (Xi'an Jiaotong University); and Shanghai (Shanghai Jiaotong University, Shanghai Institute of Mechanical Engineering and Shanghai Institute of Technology). He also negotiated a draft exchange agreement with Shanghai Jiaotong University and discussed the feasibility of academic exchanges with the Chinese institutions at which he lectured.

T. Stathopoulos, Associate Professor of Building Studies and Associate Director of the Centre for Building Studies, visited

China in August 1986 with a Concordia delegation that was invited by the Chinese Academy of Building Research. In addition to the Academy in Beijing, he visited the Northwest Institute of Architectural Engineering in Xi'an, the Nanjing Institute of Technology, the Departments of Mechanics of Beijing University and Qinghua University and the Shanghai College of Architectural and Municipal Engineering. He lectured on the teaching and research activities of the Centre for Building Studies and on "Wind Effects on Buildings."

C. Y. Suen, Professor of Computer Science, visited China in late 1979 at the invitation of the Chinese Academy of Sciences. He led seminars in both Beijing and Shanghai concerning his work on computer vision and computer recognition of Chinese characters. In 1982 he returned to China to lecture at East China Normal University in Shanghai. In September 1984 he spent one week at the Central-South China Institute of Mining and Metallurgy in Hunan, where he lectured on "Pattern Recognition and Machine Intelligence." In January 1985 he lectured on "Image Processing and Computer Processing of Chinese Language" at East China Normal University and at Zhejiang University in Hangzhou.

M. N. S. Swamy, Professor of Electrical Engineering and Dean of the Faculty of Engineering and Computer Science, traveled to China in June 1983 with a delegation sponsored by the Canada/China Friendship Society. He visited several Chinese universities during his three week tour and presented five seminars in his area of specialization.

J. C. Y. Wang, Associate Professor of Building Studies, traveled to China in June and July 1986 at the invitation of the Shandong Institute of Technology in Jinan, the Society of Refrigerating and Air-Conditioning Engineers in Beijing and the Association of Science and Technology in Yantai. During his one month stay he presented seminars on "The Effect of Oil on Condensation of Refrigeration Vapours" and on "Thermal Constriction Resistance" at the above-mentioned institutes. He also gave talks on advances in heat transfer, in refrigeration and air-conditioning and in general mechanical engineering at the Shanghai Institute of Mechanical Engineering, Qinghua University, the Chinese Academy of Building Research, the Harbin Institute of Technology and at various industrial facilities.

FACULTY OF FINE ARTS

R. Bigelow, Associate Professor of Fine Arts (Sculpture, Ceramics and Fibres), visited South China for two weeks in summer 1984 as a tourist.

Y. J. Gaucher, Professor of Fine Arts (Painting and Drawing), traveled to China in May 1986 as a tourist. His one month itinerary included Beijing, Nanjing, Shanghai, Hangzhou, Xi'an,

Guilin and Guangzhou.

R. Greenberg, Associate Professor of Fine Arts (Art History) visited China for seven weeks in Fall 1981. She participated in archaeological and museum tours in Beijing, Shanghai, Xi'an, Kunming, Guilin and Guangzhou.

LIBRARY

L. Carpentier, Government Publications Librarian, visited Guangzhou for five days in 1975 as a participant in a Concordia University course on "East Asia: Past and Present."

L. R. Singer, Fine Arts and Non-Print Librarian, accompanied her husband on Concordia study tours to China in both 1975 and 1976. She returned to China for fifteen days in May 1986, visiting universities, academies and research institutes in Beijing, Nanjing, Xi'an, Hangzhou and Shanghai. She also had the opportunity to meet with officials of the National Library in Beijing.

CHINESE ACADEMICS WHO HAVE STUDIED AT CONCORDIA UNIVERSITY

Our university has welcomed eighty-one Chinese academics for advanced study and research since 1979, including forty-nine graduate students and thirty-two visiting scholars. Chinese academics have been accommodated in our Faculties of Engineering and Computer Science (46), Arts and Science (24) and Commerce and Administration (11). Although they have been active in fifteen academic departments of our university, Chinese academics have been concentrated in the Departments of Computer Science (24) and Mechanical Engineering (14). These Chinese academics have been drawn from many institutions in China, but the largest number have come from People's University (8), the University of International Business and Economics (5), the Chinese Academy of Sciences (4) and Chinese University of Science and Technology (4). Eight Chinese academics have already received graduate degrees from Concordia University and forty-four others - the majority of whom are enrolled in graduate degree programs - are presently on campus.

FACULTY OF ARTS AND SCIENCE

Che Xiangqian has been enrolled in the M.A. program of our English Department since January 1984 and is working under the supervision of Professor R. K. Martin. He graduated from Hangzhou Teachers College in 1981 and - at the time of his departure for Canada - was working as a teacher at the Television University of China.

Chen Peishuo has been enrolled in the M.Sc. of our Mathematics Department since September 1986. He received his B.Sc. in Mathematics from East China Normal University in 1982 and - at the time of his departure for Canada - was a teacher at Shanghai Finance and Trade Management College.

Cheng Naili has been enrolled in our Special Individual Program for M.A. students since January 1986 and is working under the supervision of Communication Studies Professor G. Valaskakis. Cheng received her B.A. in English from Henan Teachers College in 1982 and began her Qualifying Program in Arts at Concordia in Fall 1983.

Ding Hengqi spent Spring 1983 as a visiting researcher working in our Centre for Teaching English as a Second Language under the supervision of Professor M. Petrie. At the time of his departure for Canada, Ding was a professor of English at the University of International Business and Economics (formerly the Beijing Institute for Foreign Trade).

Feng Yan has been enrolled in the M.A. (Educational Technology)

program of our Education Department since September 1986 and is working under the supervision of Professor R. H. Schmid. She served for eight years as a tour guide and interpreter for the China International Travel Service and - at the time of her departure for Canada - was a visiting teacher at Yenjing College.

Han Shiying spent the 1984/85 academic year as a visiting researcher working with physics Professor S. K. Misra on "electron paramagnetic resonance." At the time of his departure for Canada, Han was a professor at the Center for Material Analysis of Nanjing University.

He Xiqin spent the 1982/83 academic year as Visiting Research Associate Professor working in our Biology Department's Ecotoxicology Research Laboratory with Professors P. Anderson and G. Leduc. At the time of his departure for Canada he was a researcher in the Hydrobiology Institute of the Chinese Academy of Sciences in Wuhan.

Huang Sheng has been enrolled in the M.Sc. program of our Mathematics Department since January 1986. He received his B.Sc. in Applied Mathematics from Xiamen University in 1983 and - at the time of his departure for Canada - was teaching in the Department of Mathematics of Xiamen University.

Lee Zhongjing has been enrolled in the M.Sc. program of our Mathematics Department since September 1985. She graduated from the Statistics Department of the Shanghai Institute of Finance and Economics in 1966 and - at the time of her departure for Canada - was teaching industrial statistics in the Economics Department of Anhui University.

Li Dezi spent winter and spring 1984 as a visiting researcher working in our Centre for Teaching English as a Second Language under the supervision of Professor M. Petrie. At the time of his departure for Canada, Li was a professor of English at the University of International Business and Economics (formerly the Beijing Institute for Foreign Trade).

Li Ning enrolled in our Centre for the Teaching of English as a Second Language in September 1983 and was awarded a TESL Certificate in Summer 1984. During her stay at Concordia Li was supported by CIDA and supervised by Professor M. Petrie. At the time of her departure for Canada, Li was a lecturer in English at the University of International Business and Economics (formerly the Beijing Institute for Foreign Trade).

Li Xuan has been enrolled in the M.Sc. program of our Chemistry Department since September 1986 and is working under the supervision of Professor P. H. Bird. He received his B.Sc. in Organic Chemistry from Beijing Teachers College in 1984 and - at the time of his departure for Canada - was employed as an Assistant Teacher at Beijing Teachers College.

Liang Zhongfeng has been enrolled in the M.A. program of our Sociology Department since September 1984. He graduated from Shanxi University with a major in history in 1977 and - at the time of his departure for Canada - was an editor at the Chinese Academy of Social Sciences.

Lin Tong has been enrolled in the M.A. program of our Economics Department since January 1985. He received his B.A. in Commercial Statistics from People's University in 1983 and - at the time of his departure for Canada - was employed as a lecturer at Beijing Commercial University.

Liu Jianya has been enrolled in our Special Individual Program for Ph.D. students since September 1986 and is working under the supervision of Biology Professor E. B. Newman. He received his B.Sc. in Microbiology from Nankai University in 1984 and - at the time of his departure for Canada - was working toward his M.Sc. at the Microbiology Institute of the Chinese Academy of Sciences.

Liu Jiming has been enrolled in the M.A. (Educational Technology) program of our Education Department since January 1986 and is working under the supervision of Professor G. Boyd. He received his B.Sc. in Electrical Engineering from East China Normal University in 1983 and - at the time of his departure for Canada - was studying computer-based education at the Institute of Educational Technology of East China Normal University.

Lou Youshi has been enrolled in our Special Individual Program for Ph.D. students since September 1986 and is working under the supervision of Professor A. Boyarsky. He had previously enrolled in the M.Sc. program of our Mathematics Department and was awarded the M.Sc. in Mathematics in May 1986. Lou graduated from the Mathematics Department of Fudan University in 1965 and completed his postgraduate training in the Mathematics Department of Anhui University in 1981. At the time of his departure for Canada, he was a teacher at Hefei Industrial Construction University.

Peng Jialin has been enrolled in the M.A. program of our English Department since September 1983. At the time of his departure for Canada, Peng was on the staff of the Foreign Languages Department of Guangxi University.

Shi Ai spent Spring 1983 as a visiting researcher working in our Centre for Teaching English as a Second Language under the supervision of Professor M. Petrie. At the time of his departure for Canada, Shi was a professor of English at the University of International Business and Economics (formerly the Beijing Institute for Foreign Trade).

Sun Jiansheng has been enrolled in the Ph.D. program of our Physics Department since December 1986 and is working under the supervision of Professor S.K. Misra. At the time of his departure for Canada, Sun was a graduate student at the Centre

for Material Analysis of Nanjing University.

Wang Changlu spent the 1984/85 academic year as a visiting researcher working with physics Professor S.K. Misra on "electron paramagnetic resonance." Since September 1985 he has been enrolled in our Ph.D. program in physics. Wang graduated from the Physics Department of Jilin University in 1975 and - at the time of his departure for Canada - was Assistant Professor of Physics at Jilin University.

Wang Chunzheng has been enrolled in the Ph.D. program of our Physics Department since September 1985 and is working under the supervision of Professor S. K. Misra. He received his M.Sc. in Solid State Physics from Guangxi University in 1981 and - at the time of his departure for Canada - was teaching physics at Guangxi University.

Wang Zhendi has been enrolled in the M.Sc. program of our Chemistry Department since September 1986 and is working under the supervision of Professor C. H. Langford. He received his M.Sc. in Analytical Chemistry from Beijing University in 1982 and - at the time of his departure for Canada - was pursuing doctoral studies at that institution.

Yuan Wei enrolled in our Centre for the Teaching of English as a Second Language in September 1984 and was awarded a TESL Certificate in Summer 1985. During her stay at Concordia Yuan was supported by CIDA and supervised by Professor M. Petrie. At the time of her departure for Canada, Li was a graduate in English from the University of International Business and Economics (formerly the Beijing Institute for Foreign Trade).

FACULTY OF COMMERCE AND ADMINISTRATION

Chen Zhiqiang enrolled in our M.B.A. program in September 1983 under the auspices of the CIDA-funded Canada/China Management Exchange Program. He was awarded the M.B.A degree in May 1986 after completing his thesis project on "The Development of China's Tourist Industry." Chen graduated from the Beijing Second Foreign Languages Institute in 1978 and - at the time of his departure for Canada - was teaching English to students majoring in world economy at People's University in Beijing.

Fang Yongqing has been enrolled in our M.B.A. program since September 1984 under the auspices of the CIDA-funded Canada/China Management Exchange Program. Fang received his B.A. in Industrial Management from People's University in 1982 and - at the time of his departure for Canada - was a lecturer in the Correspondence College of People's University.

Wang Jie enrolled in our M.B.A. program in September 1983 under the auspices of the CIDA-funded Canada/China Management Exchange

Program. He was awarded the M.B.A degree in May 1986 after completing his thesis project on "The Business Growth of Foreign Banks in China." Wang received his B.A. in International Finance from People's University in 1983.

Wen Kun spent the 1985/86 academic year as a CIDA-supported visiting scholar in our Faculty of Commerce and Administration. At the time of his departure for Canada, Wen was an Associate Professor in the Department of Finance of People's University in Beijing.

Wu Deqing spent the 1983/84 academic year as a CIDA-supported visiting scholar in our Faculty of Commerce and Administration. At the time of his departure for Canada, Wu was a management professor at People's University in Beijing.

Wu Yuwu has been enrolled in our M.B.A. program since September 1984 under the auspices of the CIDA-funded Canada/China Management Exchange Program. Wu received his B.Eng. in Civil Engineering from the South China Institute of Technology in 1982 and - at the time of his departure for Canada - was a teacher in the Faculty of Management of Tianjin University.

Xie Jialin has been enrolled in our M.B.A. program since September 1985 under the auspices of the CIDA-funded Canada/China Management Exchange Program. Xie received his B.A. in Economics from People's University in 1983 and - at the time of his departure for Canada - was an assistant teacher in the Department of Commercial Economics of People's University.

Xu Kuan enrolled in our M.B.A. program in September 1983 under the auspices of the CIDA-funded Canada/China Management Exchange Program. He was awarded the M.B.A. degree in May 1986 after completing his thesis project on "The Changes of Chinese Economic Structure and the Resulting International Business Opportunities." Xu graduated from the political economics course at Beijing Teachers College in 1978 and - at the time of his departure for Canada - was engaged in teaching and research in the Department of Political Economics of People's University.

Yang Song has been enrolled in our M.B.A. program since September 1986 under the auspices of the CIDA-funded Canada/China Management Exchange Program. Yang received his B.Eng. in Mechanical Engineering from Tianjin University in 1982 and - at the time of his departure for Canada - was an Assistant Instructor in the Management Institute of Tianjin University.

Zhang Hao has been enrolled in our M.B.A. program since September 1985 under the auspices of the CIDA-funded Canada/China Management Exchange Program. He received his B.A. in Economics from People's University in 1982 and - at the time of his departure for Canada - worked in the editorial department of Economic Theory and Business Management at People's University.

Zhang Xiaotong spent the period from January through August 1985 as a CIDA-supported visiting scholar in our Faculty of Commerce and Administration. At the time of his departure for Canada, Zhang was a professor in the Mechanical Engineering Department of Tianjin University.

FACULTY OF ENGINEERING AND COMPUTER SCIENCE

Cao Xin has been enrolled in the M.Comp.Sc. of our Computer Science Department since September 1983. She graduated from the Shanghai Electric Power Institute in 1981 and spent the period from January 1982 to September 1983 in Concordia University's Qualifying Program (Engineering).

Chen Duanshi spent the years 1981 to 1983 as a visiting scholar working with mechanical engineering Professor T. S. Sankar on vibration research. He graduated from the Marine Engineering Department of Shanghai Jiaotong University in 1964 and - at the time of his departure for Canada - was a Lecturer in the Marine Engineering Department of Shanghai Jiaotong University.

Chen Jirui has been enrolled in the M.Eng. program of our Mechanical Engineering Department since September 1986. He received his B.Eng. from the Chongqing Institute of Architecture and Engineering in 1982 and - at the time of his departure for Canada - was completing his M.Eng. at the same institution.

Chen Ziling spent the years 1981 to 1983 as a visiting scholar working with computer science Professor C. Y. Suen on "microprocessors and applications for industrial control." At the time of his departure for Canada, Chen was an engineer in the Computer Centre of the Beijing Mechanical and Electrical Research Institute.

Dai Weiliang has been enrolled in the M.Eng. of our Mechanical Engineering Department since June 1982. He received his B.Eng. in Automatic Control from the Nanjing Institute of Technology in 1982.

Dai Weiqian has been enrolled in the Diploma program of our Computer Science Department since September 1985. He graduated from Jinling Vocational University with a specialization in engineering geology in 1983.

Fang Zhigang has been enrolled in the Ph.D. program of our Mechanical Engineering Department since January 1985. He received his M.Eng. in Thermophysics from the Huazhong University of Science and Technology in 1982.

Feng Gengjin spent the 1980/81 academic year as a visiting scholar working with mechanical engineering Professor R. M. H. Cheng on fluid control research. He graduated from the

Mechanical Engineering Department of Qinghua University in 1958 and - at the time of his departure for Canada - was an engineer in the Tianjin Post and Communications Machinery Factory.

Fu Qi has been enrolled in the Ph.D. program of our Civil Engineering Department since January 1986. He received his M.Eng. from the Beijing Institute of Agricultural Mechanization in 1984 and - at the time of her departure for Canada - was an instructor in the field of soil dynamics at the Beijing Institute of Agricultural Mechanization.

Gao Dayong has been enrolled in the Ph.D. program of our Mechanical Engineering Department since January 1984. He received his B.Sc. in Gas Dynamics from the Chinese University of Science and Technology in 1981 and - at the time of his departure for Canada - was engaged in postgraduate work in the Department of Modern Mechanics at the same institution.

Gao Lun spent the 1985/86 academic year as a visiting scholar working with computer science Professor H. F. Li on systems processor design. At the time of his departure for Canada, Gao was a research engineer at the Hunan Computing Technology Research Institute in Changsha.

Gu Yixian spent the years 1980 to 1982 as a visiting scholar working with computer science Professor C. Y. Suen on computer recognition of Chinese characters. At the time of his departure for Canada, Gu was an engineer at the Beijing Institute of Data Processing Techniques of the Great Wall Industrial Corporation of China.

Gu Yongming spent the 1984/85 academic year as a visiting scholar working with Professor T. S. Sankar on computer-aided design.

Han Yafang worked as a visiting scholar in our Mechanical Engineering Department around 1980. She graduated from the Metallurgy Department of Shanghai Jiaotong University in 1968 and - at the time of her departure for Canada - was an engineer at the Institute of Aeronautical Materials.

Hong Su has been a visiting scholar in the Mechanical Engineering Department since May 1986. He is working on "vehicle dynamic systems" under the supervision of Professor T. S. Sankar. At the time of his departure for Canada, Hong was a lecturer at Hefei Polytechnical University.

Huang Qian has been enrolled in the Ph.D. program of our Mechanical Engineering Department since September 1985. He received his M.Eng. in Applied Mathematics and Mechanics at Qinghua University and - at the time of his departure for Canada - was pursuing doctoral studies at the Shanghai University of Technology.

Huang Junguo spent the years 1983 to 1985 as a visiting scholar

working with computer science Professor C. Y. Suen on computer recognition of Chinese characters. At the time of his departure for Canada, Huang was a senior engineer at the Third Research Institute of the Ministry of Post and Telecommunications in Shanghai.

Jiang Zheng has been enrolled in the Ph.D. program of our Centre for Building Studies since June 1985. She received her M.Eng. in Thermophysics from Qinghua University in 1983.

Jiang Zuoqin spent the years 1984 to 1986 as a visiting scholar working with computer science Professor B. C. Desai on "database management systems and user interface." At the time of her departure for Canada, Jiang was a scientific worker at the Geophysical and Geochemical Prospecting Institute of the Ministry of Geology and Mineral Resources.

Li Lan has been a research associate of the Civil Engineering Department since January 1986. Her work focuses on "acoustic emissions applied to geotechnical materials and concrete." She graduated from the Electrical Engineering Department of Shanghai Jiaotong University in 1966 and - at the time of her departure for Canada - was teaching in the Modern Mechanics Department of the Chinese University of Science and Technology.

Li Liwu was enrolled in the M.Comp.Sc. program of our Computer Science Department during the 1984/85 academic year. He received his M.Sc. in Computer Science from Beijing University in 1983.

Lin Zhencheng has been enrolled in the M.Eng. program of our Electrical Engineering Department since June 1985. He received his B.Eng. from the Automatic Control Department of the Nanjing Institute of Technology in 1982 and - at the time of his departure for Canada - was a teacher in the Control Engineering Department of the Nanjing Institute of Technology.

Lu Zhen was enrolled in the M.Eng program of our Mechanical Engineering Department from June 1982 until June 1984. He graduated from the Department of Marine Power Plant at Shanghai Jiaotong University in 1962 and completed postgraduate study on thermo-flow at the same institution in 1966. At the time of his departure for Canada Lu was engaged in teaching and research at Shanghai Jiaotong University.

Ma Qunsheng of Qinghua University spent the 1984/85 academic year as a visiting scholar working with computer science Professor T. Fancott on computer architecture.

Ni Shimao was enrolled in the Ph.D. program of our Mechanical Engineering Department from September 1981 until January 1983. He received his M.Eng. in Thermophysics from Qinghua University in 1981.

Qu Yanzhen has been enrolled in the Ph.D. program of our Computer

Science Department since September 1986. He received his B.Eng. in Electrical Engineering from Anhui University in 1982 and his M.Eng. in Electrical Engineering from the Chinese University of Science and Technology in 1984. At the time of his departure for Canada, he was Assistant Professor in the Electrical Engineering Institute of the Chinese Academy of Sciences.

Shang Heping has been enrolled in the M.Comp.Sc. program of our Computer Science Department since September 1986. He received his B.Sc. in Computer Science from the Changsha Institute of Technology in 1981 and - at the time of his departure for Canada - was an assistant teacher at the Changsha Institute of Technology. He spent the 1985/86 academic year at Concordia University as a visiting scholar working on "distributed operating system" under the supervision of Professor H.F. Li.

Song Huaying spent the years 1984 to 1986 as a visiting scholar working with computer science Professor C. Y. Suen on computer generation of Chinese characters. At the time of her departure for Canada, Song was an engineer at the China Electronics Engineering Design and Research Institute.

Sun Jianli enrolled in the M.Comp.Sc. program of our Computer Science Department in September 1983 and received his degree in June 1985. He completed his thesis on "Multi-speaker Computer Recognition of Ten Connectedly Spoken Letters" under the supervision of Professor C. Y. Suen. He received his B.Sc. in Computer Software from Chongqing University in 1982 and - at the time of his departure for Canada - was teaching in the Department of Computers and Automation of Chongqing University.

Sun Xiaoling has been enrolled in the M.Comp.Sc. program of our Computer Science Department since January 1985. She graduated from the Department of Electrical Engineering at Shenyang Machinery and Electricity University in 1976 and - at the time of her departure for Canada - was a researcher at the Shenyang Institute of Computing Technology of the Chinese Academy of Sciences.

Tang Jing was a CIDA-supported WUSC trainee who spent the 1985/86 academic year working in our Mechanical Engineering Department. He worked on control systems under the supervision of Professors T. S. Sankar and R. M. H. Cheng.

Tang Yuanyan was enrolled in the Ph.D. program of our Electrical Engineering Department from September 1982 until June 1984, when he transferred to the Ph.D. program in our Computer Science Department. He received his M.Eng. from the Graduate School of Posts and Telecommunications in 1981.

Wang Jiedong has been enrolled in the M.Eng. program of our Electrical Engineering Department since September 1984. He graduated from the Electrical Engineering Department of the Shanghai Institute of Power Engineering in 1982 and - at the time

of his departure for Canada - was teaching at the Cadre School of the Management Bureau of Electric Power Industry of East China.

Wang Kai is a visiting scholar who has been working with computer science Professor C.Y. Suen since September 1986 on computer recognition of Chinese characters. At the time of his departure for Canada, Wang was Associate Professor and Vice Chairman of the Electronic Science Department of East China Normal University.

Wang Qingren enrolled in the Ph.D. program of our Electrical Engineering Department in September 1980 and transferred to the Ph.D. program in our Computer Science Department in September 1983. He received his Ph.D. in Computer Science in May 1984 after successfully completing his thesis on "Decision Tree Approach to Pattern Recognition Problems in a Large Character Set." Wang graduated from the Mathematics Department of Beijing University in 1968 and - at the time of his departure for Canada - was engaged in post-graduate study at Beijing University.

Wang Yunyi spent the years 1981 to 1983 as a visiting scholar working with computer science Professor B. C. Desai on "interconnection of multiprocessors." At the time of his departure for Canada, Wang was a lecturer at the Central-South College of Mining and Metallurgy.

Xie Kezhong spent the years 1980 to 1982 as a visiting scholar working with Professor C. Y. Suen on computer generation of Chinese characters. At the time of his departure for Canada, Xie was a lecturer at the Central-South College of Mining and Metallurgy.

Yang Qingshi came to our Civil Engineering Department in early 1985 as a visiting scholar, but subsequently became a research associate. He is working on "finite element technique" and "constitutive equations" under the supervision of Professor H. B. Poorooshasb. He graduated in 1966 from the Modern Mechanics Department of the Chinese University of Science and Technology and - at the time of his departure for Canada - was teaching in the same institution.

Yang Yongzhen spent the years 1983 to 1985 as a visiting scholar working with computer science professor C. Y. Suen on computer science and automation. At the time of his departure for Canada, Yang was Associate Professor of the Computer and Automation Department of Chongqing University.

Zhang Rangmao spent the years 1983 to 1985 as a visiting scholar working with computer science Professor C. Lam on multiprocessors. At the time of his departure for Canada, Zhang was a researcher at the Shenyang Computer Institute.

Zhang Taiyi spent the years 1981 to 1983 as a visiting scholar working with computer science Professor C. Y. Suen on image processing and pattern recognition. At the time of his departure

for Canada, Zhang was a Lecturer at Chongqing University.

Zhang Xilin has been enrolled in the M.Eng. program of our Mechanical Engineering Department since January 1986. He received his M.Eng. from Central Television College of China in 1982.

Zhou Shumei spent the years 1981 to 1983 as a visiting scholar working with computer science professors C. Y. Suen and T. D. Bui on "mathematical aspects of signal processing." At the time of her departure for Canada, Zhou was a Lecturer at the Huazhong Institute of Technology in Wuhan.

Zhu Xiwu has been enrolled in the M.Eng. program of our Centre for Building Studies since September 1985. He received his B.Eng in Civil Engineering from Beijing University of Technology in 1982 and - at the time of his departure for Canada - was an engineer in the Beijing Research Institute of the Bureau of Highways.

Zhu Yi has been enrolled in the M.Eng. program of our Electrical Engineering Department since September 1984. He received his B.Sc. in Control Engineering from Shanghai Jiaotong University in 1983.

Zhu Yisong is a visiting scholar who has been working on databases with computer science Professors P. Goyal and F. Sadri since August 1986. At the time of his departure for Canada, Zhu was an engineer in the Software Department of the Nanjing Automation Research Institute.

CONCORDIA UNIVERSITY AND ACADEMIC EXCHANGES WITH CHINA

While Concordia University has welcomed Chinese academics from several dozen Chinese universities, colleges, research institutes and academies, it has also developed closer relations with a small number of Chinese institutions with compatible academic interests. At the present time, the university has formal exchange arrangements with three Chinese institutions - People's University, Tianjin University and the Chinese Academy of Building Research - and is also in the process of reviewing proposals for academic exchanges with several other Chinese institutions.

Central Institute of Finance and Banking (Beijing) -- A Chinese Finance and Economics Delegation visited Concordia University in September 1986 in order to explore the feasibility of concluding an academic exchange agreement. As a result of this visit Concordia University has indicated to the Vice President of the Central Institute of Finance and Banking in Beijing that "...in principle -- and subject to the availability of appropriate funding..." we would be prepared to enter further discussions concerning exchanges in the areas of economics, finance and management information systems.

Chinese Academy of Building Research (Beijing) -- Our Centre for Building Studies concluded an agreement with the Chinese Academy of Building Research during the August 1986 visit of a three member Concordia delegation led by CBS Director P. Fazio. During a follow-up visit to Montreal in October by a four member delegation from the Chinese Academy of Building Research, possible areas of cooperative research and student training were identified and financial requirements outlined.

Microbiology Institute of the Chinese Academy of Sciences (Beijing) -- Contact with the Microbiology Institute of the Chinese Academy of Sciences began during biology Professor E.B. Newman's spring 1985 visit to the Chinese University of Science and Technology. A graduate student from the Institute has been enrolled in our Ph.D. program (SIP/Biology) since September 1986 and a second student is expected in spring 1987. The Institute has recently indicated interest in formalizing its relationship with Concordia University.

Nanjing Institute of Technology (Nanjing) -- Contact with the Nanjing Institute of Technology (a key science and technology

university) began during Professor Martin Singer's spring 1986 visit to China at the invitation of the Chinese Education Association for International Exchanges. He spent several hours discussing academic exchanges with Vice President Wei Yu, who is one of China's most important women academics. Since that visit, relations with Nanjing Institute of Technology have developed rapidly. In July Dr. Wei visited Concordia and met with our Dean of Engineering and Computer Science and with a number of our department chairmen and researchers in engineering and the sciences. In August Dr. P. Fazio, Director of our Centre for Building Studies led a three member delegation on a brief visit to the Nanjing Institute of Technology. He returned in September with the outline for a draft agreement, to which our Vice-Rector Academic responded in October. During the November visit to Concordia University of a prominent Chinese education delegation, our developing relationship with Nanjing Institute of Technology was encouraged, particularly as it relates to the provision of joint doctoral training for Chinese graduate students. At the moment both sides are working to conclude an academic exchange agreement which can be submitted to external agencies in China and Canada for funding.

Nanjing University (Nanjing) -- Discussions with Nanjing University (a key institution of liberal arts and natural sciences) began during the 1984/85 academic year, when Professor Han Shiying of Nanjing University's Centre for Material Analysis came to Montreal to work with Physics Professor S. K. Misra. During a reciprocal visit to Nanjing in November 1985, Professor Misra explored the feasibility of concluding a formal academic exchange agreement between the two institutions. Although a draft "Proposal of a Cooperative Exchange Program" between the two universities has been under discussion since December 1985, a major difficulty - particularly in the absence of external funding - is Quebec's differential fees for international students. Nevertheless, as a sign of its continuing interest in developing this exchange - while awaiting a Quebec decision on the waiving of differential fees for graduate students from China - Concordia has agreed to accept and provide financial support for a graduate student who enrolled in our Ph.D. program in Physics in December 1986.

People's University (Beijing)/Tianjin University (Tianjin) -- Concordia University is participating in a four member Montreal university consortium that is engaged in a CIDA-funded management education exchange program with both Tianjin University and People's University. A preliminary exchange agreement was negotiated in November 1982 in the aftermath of a Sino-Canadian Management Conference organized by the Association of Universities and Colleges of Canada on behalf of CIDA. The agreement was revised as the result of a June 1983 trip to China

by a four member Montreal delegation. The four year CIDA-funded agreement between the four Canadian and two Chinese universities, became effective in September 1983 and calls for: the training of M.B.A. students from China in Montreal; the accomodation of Chinese visiting scholars in Canada; the dispatch of Canadian professors to China to teach masters level MBA courses; and the purchase of relevant materials.

There has been considerable academic exchange activity under the auspices of this management education program. Concordia University's Faculty of Commerce and Administration has hosted a total of eleven Chinese academics - eight as graduate students in its M.B.A. program and three as non-degree visiting scholars. Eight of these Chinese visitors have come from People's University (six graduate students and two visiting scholars) and three from Tianjin University (two graduate students and one visiting scholar). As of November 1986 three Chinese graduate students had already completed their M.B.A. degrees and returned to China and five others were continuing their M.B.A. studies. During the same period eight Concordia professors have visited China to offer graduate courses (seven) or lecture series (one) at People's University (six) and at Tianjin University (two). Two others have visited China more briefly to facilitate the administration of the exchange program. Phase One of this exchange agreement concludes with the dispatch of a final contingent of Concordia professors to China in spring 1987 and with the completion of degree work by five remaining Chinese M.B.A. students.

People's University has recently indicated its interest in expanding its exchange relationship with Concordia University to include the social sciences.

Shanghai International Studies University (Shanghai) -- Contact between our institutions began in June 1986 when Professor Martin Singer visited China at the invitation of the Chinese Education Association for International Exchanges. The Shanghai International Studies University was formerly the Shanghai Foreign Languages Institute and is a key university specializing in foreign languages. During the past five months there has been an exchange of letters concerning the feasibility of academic cooperation in the fields of linguistics, literature, international trade, management and journalism.

Shanghai Jiaotong University (Shanghai) -- Our Mechanical Engineering Department concluded a "Statement of Intention" with Shanghai Jiaotong University during the November 1984 visit to China of Department Chairman T. S. Sankar. Both parties have recently indicated their interest in continuing discussions concerning the possibility of further academic exchanges.

University of International Business and Economics (Beijing) -- Discussions with this institution, formerly known as the Beijing Institute for Foreign Trade, resulted from the hosting by our TESL Centre of five CIDA-sponsored visiting scholars and certificate students between spring 1983 and summer 1985. An exchange of letters between authorities in the two institutions during the spring and summer of 1984, led to the formation of a TESL-based "Ad Hoc Committee on Concordia/BIFT TESL Exchange" and the preparation of a report on the feasibility of such activities.
